### Regional Offices

#### Europe

The IUCN European Regional Office focuses on biodiversity, nature conservation, EU policy and Nature-based Solutions. The office provides valuable input into ongoing policy debates in these areas, as well as a broad platform for discussions thanks to its varied membership and open dialogues.

#### Eastern Europe and Central Asia

A region highly diverse, both in its culture, traditions and languages and in its natural values and ecological features. To help build a more sustainable future, IUCN focuses on good governance, protection of biodiversity and effective and equitable use of natural resources, while advocating diverse partnerships and dialogue, and linking science, policy and action.

#### Mediterranean

The IUCN Centre for Mediterranean Cooperation works to bridge gaps between science, policy, management and action in order to conserve nature and accelerate the transition towards sustainable development in the Mediterranean.

The main strategic lines of IUCN-Med aim to address biodiversity loss and climate change impacts through innovative and targeted initiatives represented in the following six new working areas and key topics:
