*HOW SPECIES CONSERVATION
PLANNING CAN HELP YOU ACHIEVE
YOUR SPECIES CONSERVATION GOALS*

CPSG.ORG  

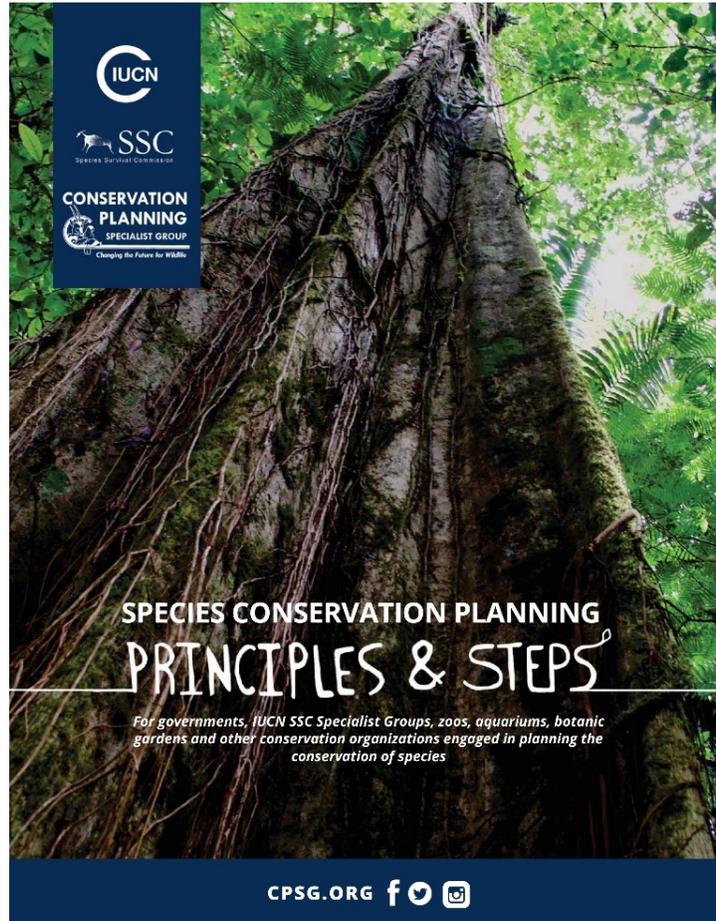

For 40 years, CPSG has been assisting diverse groups to plan for the conservation of species.

Supporting governments, NGOs, Wildlife agencies, Zoos, etc to develop collaborative species conservation plans.

Planning Principles and Steps

Europe

How we work:

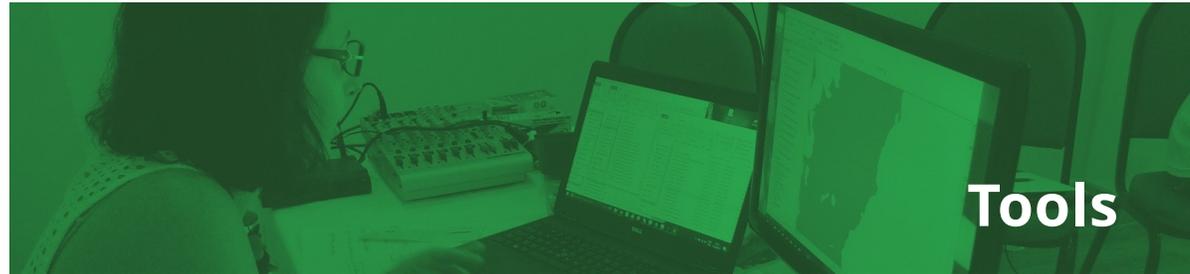

How we work:

Workshops

Design and facilitation of species conservation planning workshop

Tools

Develop and disseminate science-based tools and methodologies

How we work:

Workshops

Design and facilitation of species conservation planning workshop

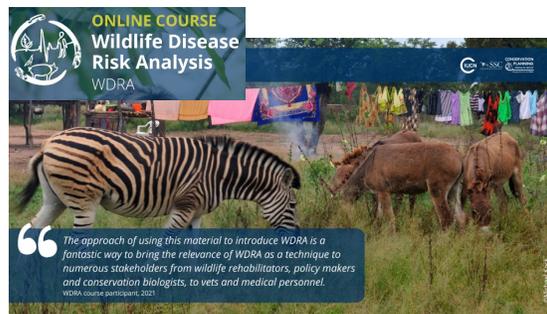

Tools

Develop and disseminate science-based tools and methodologies

Training and mentoring

Training in facilitation and tool use

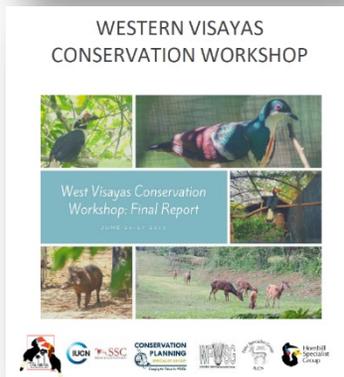

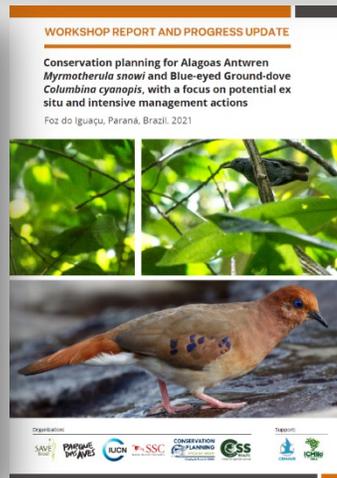

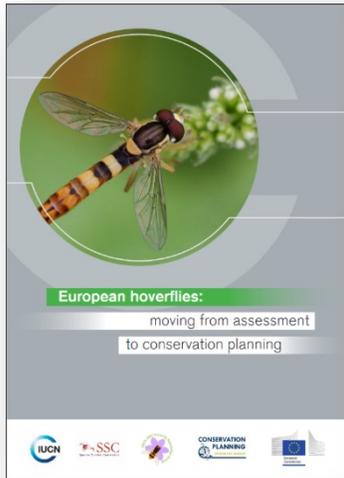

CPSG Europe:

- 39 planning workshops
- 19 training events
- One online course

Avaliação de manejo *ex situ* para 15 Primatas e a Preguiça-de-coleira

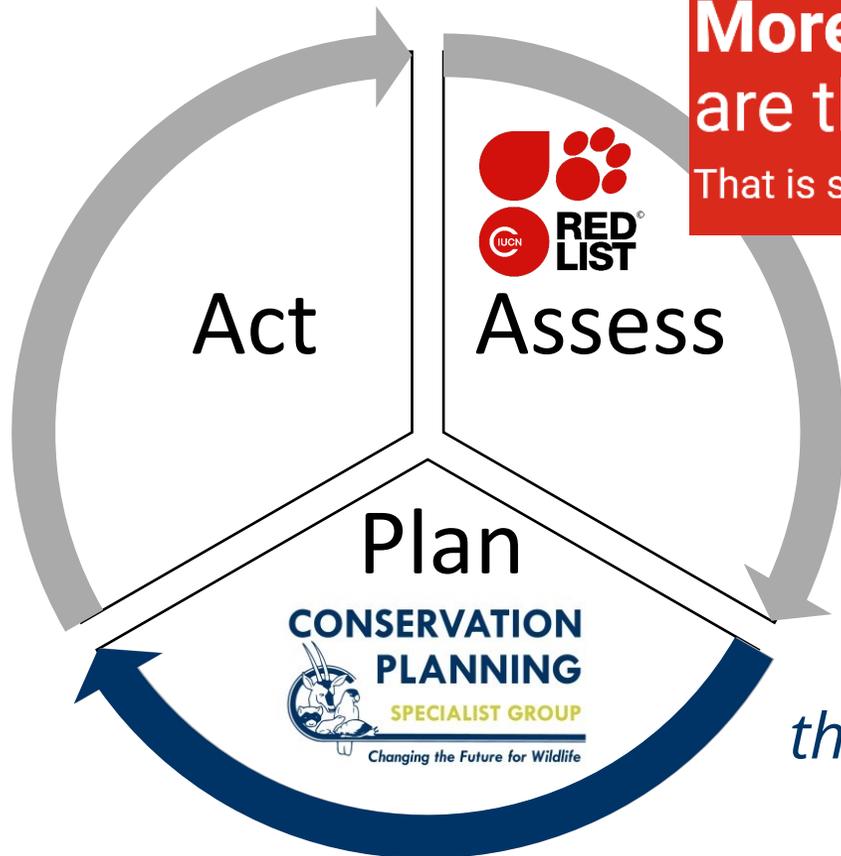

Oficina virtual | 9 - 20 agosto, 2021

The challenge

More than 40,000 species
are threatened with extinction
That is still 28% of all assessed species.

***CPSG:** lead on moving more threatened species more quickly, from assessing, through conservation planning, into effective action*

Upscale

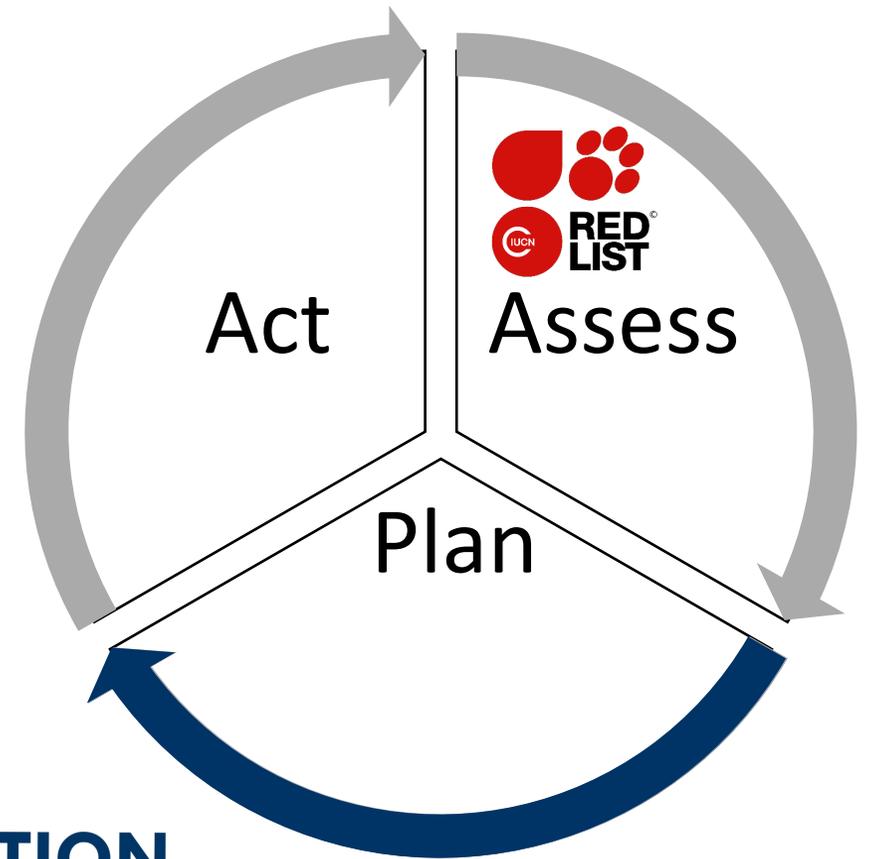

Focus Europe

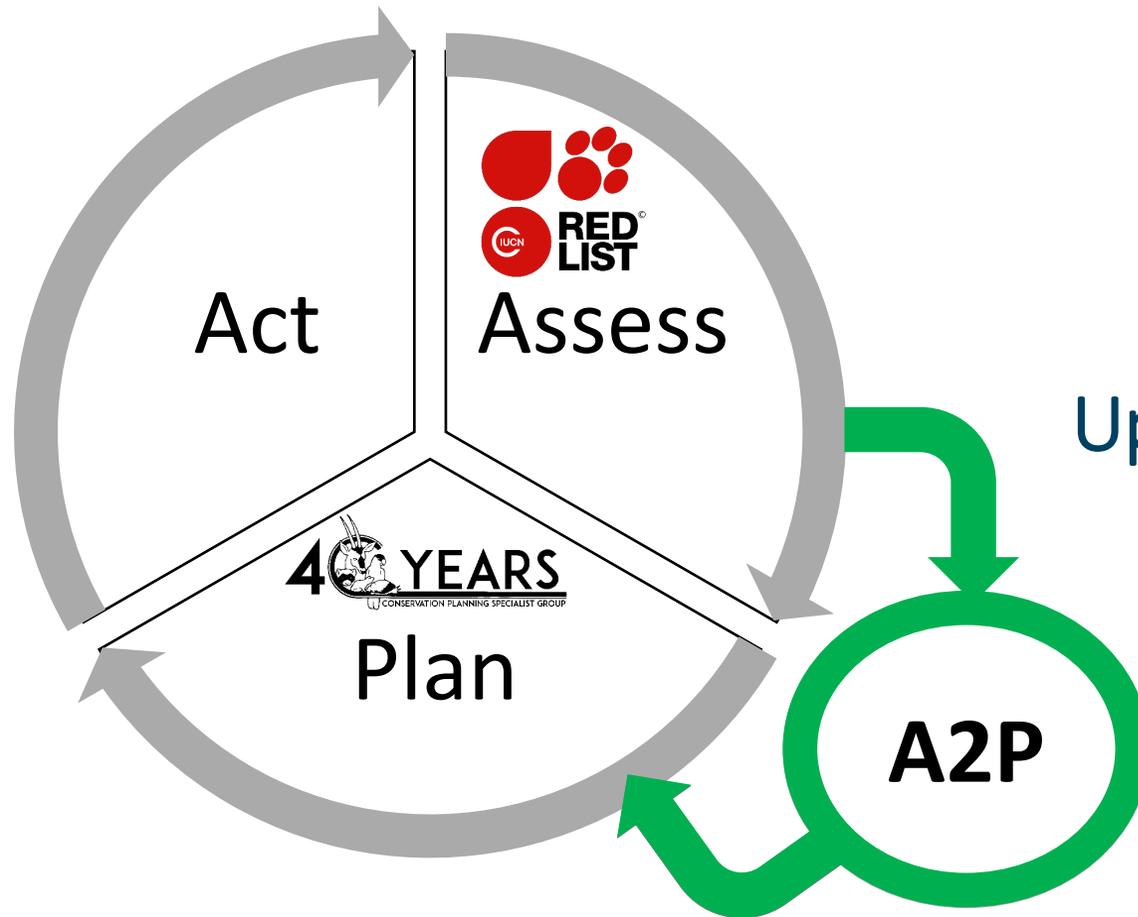

If you need help with

for species conservation planning

***Don't panic,
plan it!***

Upscaling species planning through:
**Assess to Plan (A2P) and
Multi-species Planning**

Primary threats + obstacles

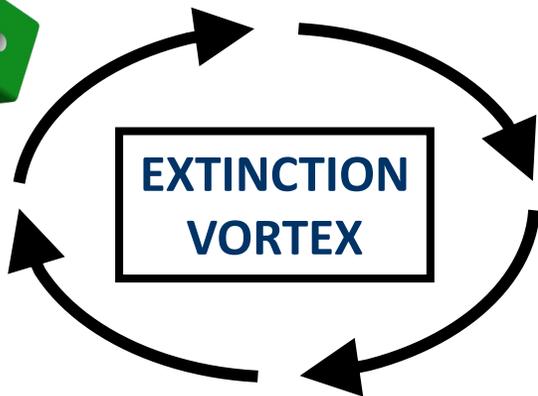

Population decline;
Small, fragmented,
isolated
populations

populations

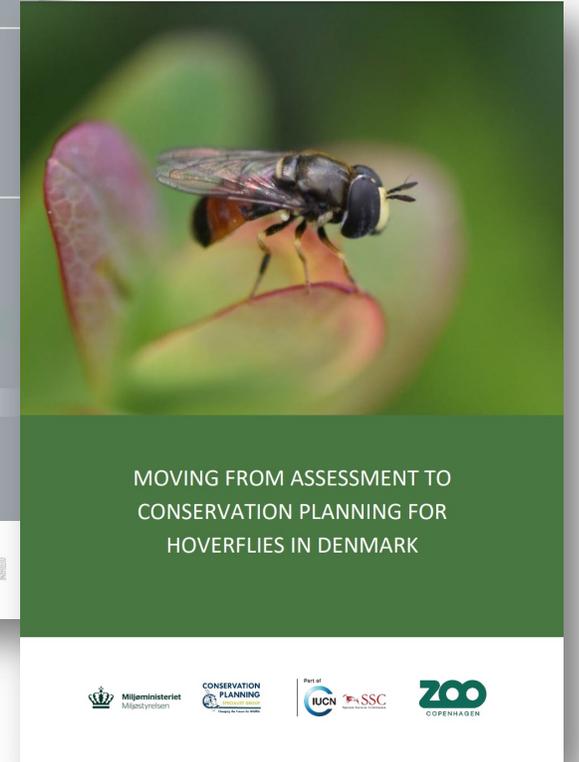

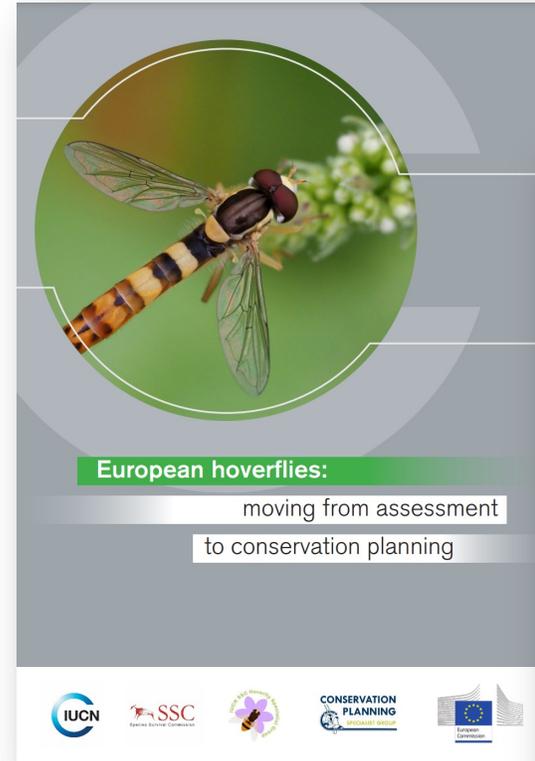

Stochastic threats

Inbreeding
Gene diversity loss

Multispecies Plans

European Hoverflies
Danish Hoverflies
*Soon: Bivalves,
Wild bees, Moths*

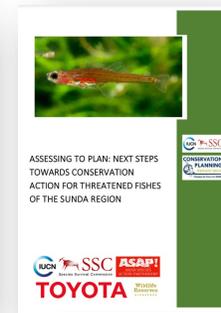

Primary threats + obstacles

Population decline;
Small, fragmented,
isolated populations

Stochastic threats

A. Actions at habitat,
(protected) area, or
threat/driver level

B. Species that may need:

- intensive management
(*across in situ – ex situ spectrum*)
- their own plan

Convention on
Biological Diversity

**Global Biodiversity
Framework Targets:**

1. Spatial Planning
2. Restoration
3. Protected Areas
5. Sustainable harvest
6. Invasive species
7. Pollution
8. Climate Change

4. Intensive Management

Ex situ Conservation Assessment ONLINE COURSE

www.cpsg.org

www.cpsg.org/training

This course will help:

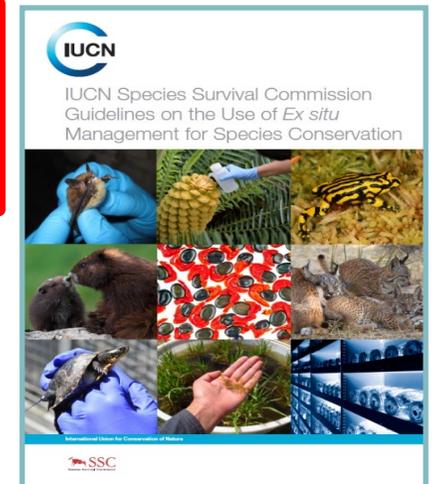

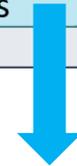

- Understand the place of species level conservation in the wider conservation context
- **How to decided if, and when to do intensive management across the *in situ/ex situ* spectrum for certain species – using the IUCN guidelines**
- Understand the range of options for *ex situ* management and the many roles this can play in species conservation

ONE Integrated Species Conservation PLAN

All required conservations actions required to conserve the species

Where appropriate Intensive population management actions

Where appropriate *ex situ* management actions

How can we help each other help European species?

- Spread the word about:
 - place of species level conservation (planning)
 - range of options for intensive management
 - CPSG (Europe) and what we have to offer
- Contact CPSG for help with:
 - single or multiple species planning workshops
 - tools or training

We like to hear from you

- Is your organization involved in developing species action plans?
- Is there a “waiting list” of species considered for action planning in your country?

Saving species: Don't panic, plan it!
